Cissell
MANUFACTURING COMPANY

MEMBER OF:

Steam-Electric Iron

The Steam Electric Iron utilizes variable temperature settings and steam to finish practically any garment including hard to finish linen, silk, and cotton. This iron also features a thermofuse to avoid overheating and is the world's only industrial steam electric iron to be UL certified. Should be used in conjunction with Cissell Lowboy assembly.

All-Steam Iron

Ideally suited for use on a legger press. Perfect for finishing wool, synthetics, or blended fabrics. This iron requires low maintenance and no electrical connection.

Cissell Lowboy

Designed for use with a Cissell Steam Electric Iron. The uniquely designed chamber and valve system separates the condensation and steam to assure hot, dry steam for a high quality finish.

The Kinzer Press * The Professional Drycleaning Press For The New Millennium

We are now proud to present the next generation of highly advanced, easy-to-use professional drycleaning presses.

Exclusive features of the Kinzer Legger and Utility Presses.

Two position head opens to a standard 60 degrees of a full 110 degrees so that the press can be used as a steam finishing board.

Unique cylinder allows different head openings (eliminates springs).

The industry's largest vacuum valve for an enhanced finish.

Snap panels (all four panels are easily removable).

Adjustable table height for different operators.

Much, much more!

AU-45-K - Air Operated Utility Press

The new patented Cissell utility press offers exclusive features which provide a high quality finish to a wide range of garments. These features include an adjustable table height and a unique cylinder which allows the press to open to a full 110°, enabling the operator to use the press as a steam finishing board.

Puff Irons

The perfect addition to a utility or legger bay for touch-up. Available in single, double, triple, or four-way units with optional vacuum and fabric pressing heads.

AOL-45-K - Automatic Legger Press

The new patented Cissell Press offers exclusive features which provide a high quality finish to pant legs and other garments. These features include adjustable table height. Maintenance free cylinder and variable head openings.

MU-45-K Manual/Foot Operated Utility Press

The new Cissell manual press offers a consistent finish on all garments. This precision balanced press provides for easy operation. Also, the height is adjustable to further reduce operator fatigue. Ideal for dry cleaning stores, clothing manufacturers and department stores.

Pants Toppers: Models A & B

The up-right Pants Topper provides a quality finish to pant tops, with or without pleats, accommodating waist sizes from 28" to 52". The Model B has an air operated waist expander and fly clamp to increase production and minimize operator fatigue.

Cissell Form Finishers * Powerful, Dependable, Versatile.

Suzie II Form Finisher

Designed to provide a high quality finish to a wide range of garments. This versatile, powerful, automatic self-adjusting form is ideal for finishing suit coats, sweaters and dresses.

Mr. Cissell Form Finisher

Designed to provide a quality finish to mens' suit jackets. The easy to use foot pedals allow for automatic or manual operation.

Ms. Cissell Form Finisher

Ideally designed for ladies dresses and delicate fabrics. Additional height allows for longer jackets with no adjustments needed.

Vacuum Spotting Board

Utilizes steam, water, heated air and vacuum to assist in removing spots and stains for any garment. Uniquely designed valve allows operator to use feathering (variable pressures) with a single spotting gun to delicately spot and finish a wide variety of garments.

Steam Finishing Board

Cissell Steam Finishing Board utilizes steam and vacuum to provide a high quality finish to a wide variety of garments for both dry cleaning and garment manufacturing. For best results use Cissell steam electric iron and Cissell Lowboy.

Steam Heated Metal Ironing Board

Designed for touch-up and extra finishing, the steam heated ironing board uses steam heated coils to provide a hot, dry ironing surface assuring quick finishing and quality production. Board is also available without steam coils.
